

PROFILE40

SINGLE FILTER HALF MASK

PROFILE 40

SINGLE FILTER HALF MASK

Profile40 is a premium half mask which has been designed to provide ultimate levels of comfort and safety. The clear facepiece is shaped to seal easily, without pressure, and to maintain that seal throughout use. Profile40 has a standard 40mm filter thread and utilises an extensive selection of Pro2000 filters.

Head movements are absorbed by bellows folds in the facepiece to prevent slippage or leaks at the seal, and the fast-don harness keeps the mask comfortable and secure. The ribs inside the nosebridge seal without gripping, to ensure no outward leakage towards the eyes. This make Profile40 particularly well suited for use with spectacles or goggles. In fact, Profile40 will fit comfortably and unobtrusively with most other types of PPE.

Profile40 premium half mask:

- Available in two sizes
- LSR silicone facepiece
- Broad, easy-fit face seal
- Fast don harness
- Single filter (Pro2000 ≤ 300g)

PROFILE40

The Profile40 facepiece is moulded in Liquid Silicone Rubber (LSR), combining the comfort and flexibility of silicone with durability and a long service life.

LSR injection moulding prevents silicone vapour release, making the Profile40 suitable for use in paint-spray areas and the slide-through harness provides fast and easy fitting and a convenient rest position.

The wide, flat faceseal is similar to that used on full facemasks, making it easy to achieve an efficient and comfortable seal, and the bellows sections at the nose and chin absorb movement to ensure the seal is not disrupted during use.

Profile40 is a single filter premium half mask with a 40mm EN148-1 thread filter connection. Profile40 accepts filters from the Pro2000 canister range that weigh 300 grams or less.

TECHNICAL DATA

Weight:	
Size S/M:	167g
Size M/L:	185g
Material Data:	
Facepiece:	Liquid Silicone Rubber
Shell:	ABS
Filter Sealing Washer:	Natural Rubber
Valve Seats:	PBT
Seat Ratchet Washer:	Acetal
Inhalation Valve Disc:	Silicone Rubber
Exhalation Valve Disc:	Natural Rubber
Exhalation Valve Cover:	Polyethylene
Harness :	Elastic PES-band
Approvals:	
Profile40 and Pro2000 filters are fully approved and CE certified to EN140, EN14387:2004, EN 143:2000/A1 2006. Profile40 EC-type examined by INSPEC, NBN 0194, CE 0194, Nr. EC1448. Pro2000 filters EC-type examined by BGIA, NBN 0121.	

ORDERING DETAILS	
032082	Profile40 M/L, silicone
032083	Profile40 S/M, silicone

Pro2000 Filters

The Scott Pro2000 canister filter range offers a wide choice of filters for specific respiratory challenges, providing high quality and cost efficient protection. Highest specification filter media and materials ensure durability and reliability in the most demanding applications.

Combining light weight and low resistance, Scott Pro2000 filters are manufactured using superior performance media, giving extended adsorption capacity for gas and combined filters and unrivalled efficiency for the particle element. Scott particle filters use only microfibre 'paper' media and do not use any electrostatic filtering methods.

Pro2000 filters are fully EN approved to the latest standards, marked 'R' for re-usable, CE marked, and connect via a 40mm EN148-1 thread. (NOTE: only filters weighing 300 grams or less are suitable for use with Profile40).

Filter Accessories	
052691	Prefilters for Pro2/Pro2000 (20) (No holders)
052692	2 Prefilter holders + 6 Prefilters
052690	2 Holders + 2 Spark Grilles
052693	2 filter sealing caps
052694	Rubber shower cover
