

# DISPOSABLE PRODUCTS / CUP SHAPED FILTERING FACEPIECES

## BLS ZERO SERIES

### Why ZerØ ? /

Why give up maximum comfort if you can have it with the best protection?

The new BLS's cup shaped line is designed to offer you both: **maximum protection and maximum comfort.** ZerØ series includes only P3 facepieces, but provides breathing resistance comparable to a P1.

#### PROTECTION Better than a P3

#### BREATHING RESISTANCE Better than a P1

\* tested by BLS Lab

PROTECT YOURSELF BETTER.  
BREATHE BETTER.

### Features /

01

#### SUPPORT

The support material has a special texture constituted of interwoven bundles of fibres which give elasticity and resistance to the material even after prolonged use under conditions of high humidity or heavy perspiration. This innovative material is also entirely, adhesive and solvent free.

02

#### GASKET

The gasket is made of a soft foam coupled with a technical fabric. The combination of the two layers provides excellent compression and deformation combined with an elevated user's comfort. The textile layer is very smooth and pleasant to the touch, absorbs sweat and keeps the skin cool and dry.

### EXTERNAL PROTECTIVE LAYER

The innovative protective micronet preserves the filtering material from dirt, dust and liquids. This way the external layer preserves and prolongs the filtration efficiency without increasing breathing resistance of the filtering facepiece. The micronet, less elastic and more resistant than filtering materials, protects from mechanical stress that could tear or damage the material (i.e. crease, rub).

04

### PREFORMING

The unique shape of the nose area makes the facepieces very easy to wear. The new Zer0 series fits perfectly on different head shapes to ensure an excellent seal. The new shape also ensures a wide field of vision and high compatibility with personal equipment for eyes protection.
